

The South Valley Projects and Improvements – report update - 1/25/17

The South Valley Range was opened in 2004. The primary purpose at that time was to serve the needs of local Law Enforcement. The layout was quiet simple with little more than a few target boards both fixed and movable. In 13 years the South Valley has added these operational assets - a Roof Covered Pistol Range, a Weapons Transition Range, a 150 yard Rifle Range, a Rim Fire Range ,and an 8 Stage Performance Center. It has grown to become the Premium Range Facility serving both its original LE clientele and All Premium ProTEQ Patrons. It is growing to be one of the best outdoor Firing Ranges in the Midwest with many present and future shooting assets. Study the list below. The next few years you'll see many changes in the Premium South Valley as new shooting opportunities arise and existing assets are completed....

Construction of the 10 Lane 3 to 15 yard Roof Covered Pistol ONLY Arena,		Done
Construction of the Prop Storage area,	In Process
